Notes:

Dr. Golden's ICD-10 Coding Guides are shareware. A payment of \$30 covers the use of all Dr. Golden's Coding Guides for the first year, and then \$25 annually. Go to www.tagolden.com for a complete list and links to other Dr. Golden's ICD-10 Coding Guides.

The Chrome Web Browser is the best web browser for viewing PDF files. This guide uses many PDF files.

Codes highlighted in **red** are not billable codes. The **red** codes were included as guides and for learning the new ICD-10 system.

Most codes not red highlighted in *The Golden Derm List* are billable codes.

The most specific code should be used. A 3 digit code is not billable if a 4 digit code is under it. A 4 digit code is not billable if a 5 digit code is under it, etc.

Blue fonts are hyperlinks to the web. Click to open for quick reference to ICD-10 codes.

Yellow highlights are my comments.

The Golden ICD-10 Dermatology Codes in an Alphabetical Tabular List was compiled using official ICD-10 information provided by CMS on its web site in zipped PDF files. The following six hyperlinks are the complete unzipped files:

[Golden Quick Guide for ICD10](#)

(A short guide I wrote for this reference)

The Golden ICD-10 Dermatology Codes in an Alphabetical Tabular List is not meant to be a complete listing of ICD-10 Dermatology codes. It is an accurate quick reference for most of the Dermatology ICD-10 codes that will be used.

Methodology used to compile my list. I wanted an easy to use quick reference guide that would combine the alphabetical disease index with the tabular list information.

The Golden Derm List was compiled by first finding the disease in the ICD-10 Disease Index. The Disease Index should be used as a reference for the ICD-10 Tabular List, which is more specific concerning appropriate ICD-10 codes.

The Golden Derm List will be updated on the web as improvements are made in order to keep this program at the forefront as the best.

Please, let me know if *The Golden Derm List* should contain other dermatology codes or information.
